EDUCATIONAL BACKGROUND

National University of Singapore (NUS)	Singapore
<i>MSc in Computer Engineering, College of Design and Engineering</i>	<i>Aug 2025 – Present</i>
Overall GPA: 4.38/5.0 Core Courses: Computer Engineering Project (A), Modern Computer Networks (A-), Machine Learning with Applications (B+), Wireless Communications for IoT (A-), Blockchain Engineering (B+)	
University of Electronic Science and Technology of China (UESTC)	Chengdu, China
<i>B.Eng. in Cyberspace Security, School of Computer Science & Engineering</i>	<i>Sep 2021 – Jul 2025</i>
Overall GPA: 3.73/4.0 Core Courses: Discrete Mathematics (4.0), Modern Computer Networks (4.0), Security Technology of Computer System and Network (4.0), Information Theory and Coding Theory (3.9)	

PROJECT EXPERIENCE

Research on Zero-Knowledge Proofs for Large Language Models	Singapore
<i>Research Intern (Collaborator: Yanze Jiang, SoC, NUS)</i>	<i>Mar 2026 – Present</i>
- Research dedicated zero-knowledge proof system designs for frontier AI models. - Designed and implemented Rust code and experiments for a large-scale, end-to-end zkML scheme.	
Distributed zkSNARK Based on Folding Scheme	Beijing, China
<i>Collaborative Project (Collaborator: Zesheng Li, UCAS)</i>	<i>Sep 2025 – May 2026</i>
- Designed and implemented open-source Rust code for a Sumfold-based distributed SNARK. - Designed experiments and analyzed linear scalability in prover time, verifier time, comm cost, and proof size.	
SAS-Based Post-Quantum Signature Key Exchange	Singapore
<i>Course Project (Supervisor: Prof. Marco Tomamichel, CQT, NUS)</i>	<i>Sep 2025 – Apr 2026</i>
- Studied multidimensional cost and security trade-offs of hash-based and other post-quantum digital signatures in practical networks. - Designed a SAS-based post-quantum signature public-key exchange scheme without relying on PKI.	

INTERNSHIP EXPERIENCE

Huawei 2012 Labs, Singapore Nobert Wiener Research Institute	Singapore
<i>Research Intern (Supervisor: Faye Liu)</i>	<i>Sep 2025 – Present</i>
- Researched on IEEE 802.11 PQC migration standardization and the Wi-Fi Easy Connect standard. - Development of an AI platform for standardization research. - Tracked latest research from WFA, ETSI, NIST, Bluetooth, NDSS, and related organizations/conferences.	

CAMPUS EXPERIENCE

The Students' Union of SCSE in UESTC	Chengdu, China
<i>Executive President</i>	<i>Sep 2023 – Jul 2024</i>
Led a Student Union and personally received the Six Best Student Union President award.	

AWARDS AND HONORS

<i>Outstanding Graduation Project Award (NUSRI)</i>	<i>May 2025</i>
<i>Outstanding Student Scholarship (UESTC)</i>	<i>Dec 2024</i>
<i>Model Student Scholarship (UESTC)</i>	<i>Dec 2022, 2023</i>
